MySQL · Agile
Kanban

About Me

I'm an experienced web developer, with a passion for technology. I have primarily worked in agile environments using Vue as the frontend framework and Vuetify as the design framework. I have worked on a variety of projects ranging from admin UIs for in-house systems, to webRTC soft clients. I enjoy keeping up to date with the latest technologies, challenging myself, to improve my knowledge and deliver greater value.

Experience

Senior Frontend Developer

🗎 Windsor Telecom Ltd   📍 Remote   📅 Jul 15 - present

Worked as the frontend lead within an agile team using the Kanban approach. Led the adoption of Vue within the business, and have owned and delivered a number of products, ranging from in-house CRM and admin UIs, to portals that allow customers to manage their cloud telephony services. Most recently I worked on and delivered a webRTC soft phone PWA which is now being sold and used by a large part of the customer base.

Junior Software Developer

🗎 Impact Research Ltd   📍 London   📅 Sep 14 - Jul 15

Worked as part of a small dynamic team on ad-hoc quantitative and qualitative research projects. I supported the Project Delivery Team with the integration of advanced analytics and the agile development of intuitive analysis tools for data processing, reporting and decision making models, using Visual Basic in Excel. I applied my technical knowledge to other business functions such as marketing, website development, social media and IT.

Store Assistant

🗎 Sainsbury's   📍 Bristol   📅 Sep 11 - Jul 14

Part time role whilst studying at university.

Education

Bsc IT Management for Business

🗎 UWE Bristol   📍 Bristol   📅 Sep 11 - Jul 14

Bachelors Degree: 2:1
